

Task 1

The product category name tab doesn't look good on mobile screen, please check the attachment. Please manage it when there is 5 products category or less than 5. check the below image

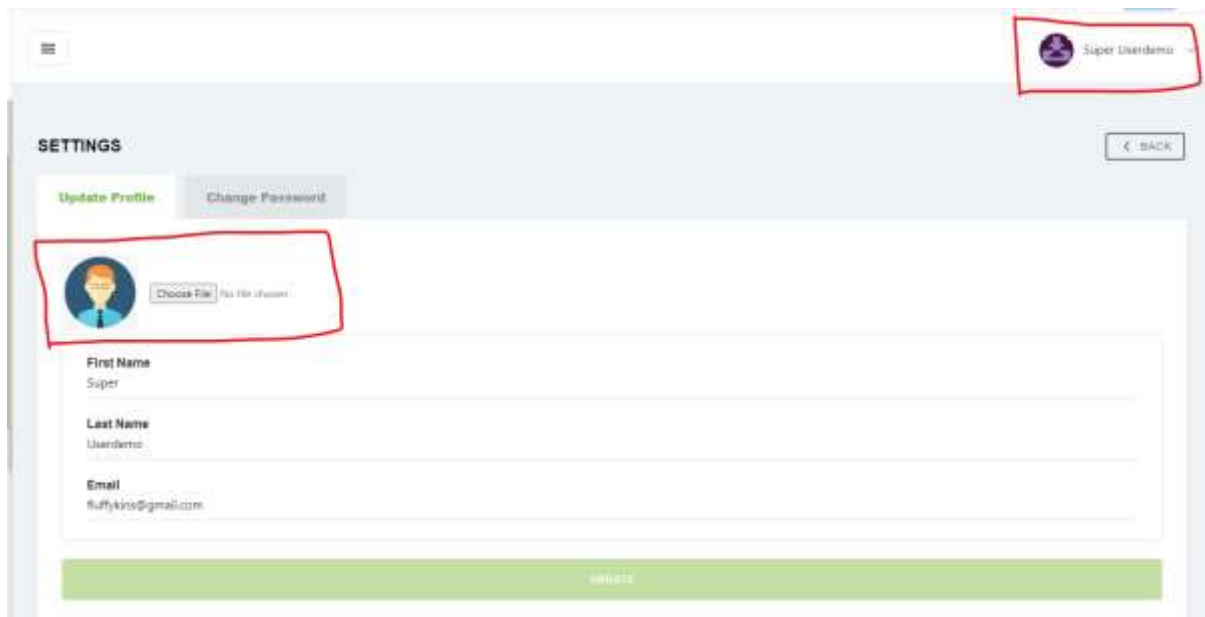

Task 2

When the User/admin change his profile, it didn't change in Header display icon. please check the description

Steps to replicate

- login with user or admin
- Go to settings page
- Now change the user/admin profile
- Now compare the profile in setting page and the header page

Task 3

Each drop down should open / close on click, now it opens on click but not closed. If the user wants to close that they need to click on another product to close

Steps to replicate the issue

- Login with user
- you can see in the menu bar there is multiple product groups
- click any product group
- On click you can see the all products in product group
- List must be closed on second click

- 6)
- 7) Now make sure that the changes you have made should also be updated on the backend and frontend
- 8) For frontend you need to login with user
